Jose R. Vega

El Paso, Texas • jvega792@gmail.com • www.linkedin.com/in/Vega123 • (915) 996-5290

EDUCATION

The University of Texas at El Paso

Master of Science in Computer Science May 2023 - May 2025

- GPA: 4.0 / 4.0, Dean's List
- Relevant Coursework: Machine Learning, Software Construction, Software Integration and V&V, Data Mining

Bachelor of Science in Computer Science Sept 2020 - May 2023

- GPA: 3.74 / 4.0
- Relevant Coursework: Data Structures & Algorithms, Advanced Object-Oriented Programming, Computer Architecture, Programming Languages

TECHNICAL SKILLS

Programming Languages: JavaScript, C, Java, Python, Julia, Lisp, Prolog, Bash, Ruby, Haskell
Framework/Technologies: Firebase, Visual Studio Code, GitHub, Linux, Cloud Shell, Selenium, Spring Boot

EXPERIENCE

Glassdoor, *Machine Learning Engineer Intern* *June 2024 – Aug 2024*

- Developed a robust machine learning-based testing service to enhance endpoint comparison accuracy, contributing to improving user-generated content and laying the foundation for broader application across various testing needs.
- Collaborated with Machine Learning Engineers to architect a dynamic testing service that supports multiple comparison types utilizing Java, Spring Boot, reactive programming, and Mockito.

Amazon, *Software Development Intern* *June 2023 – Aug 2023*

- Streamlined the two-factor messaging process, reducing cost by approximately 14%. Implementing a cost-effective solution leveraging Java, Spring Boot, Mockito, and internal tools to provide new means of messaging streams.
- Collaborated with a global team of engineers to architect new APIs in an agile environment, resulting in an improvement in the efficiency and scalability of existing systems.

Google, *Computer Science Summer Institute Scholar* *June 2021 – July 2021*

- Completed an introductory project-based JavaScript and Firebase curriculum taught by Google engineers and configured 12 individual coding projects in JavaScript by using concepts such as variables, data structures, and functions.
- Collaborated with a team to create a sports tracker app that included a live demonstration and presentation to Google employees and community leaders.

RESEARCH

Standardizing the Process of Waterfowl Species Identification using Neural Networks, Computing Alliance of Hispanic-Serving Institutions (CAHSI) Research Experience for Undergraduates (REU) program

Undergraduate Research Assistant *Jan 2022 – Dec 2023*

- Conducting research with UTEP's Computer Science Department (Constraint Research and Reading Group) and Biology Department (Lavretsky Lab), funded by CAHSI Local REU program and the Texas Parks and Wildlife Department.
- Developed a machine learning (ML) algorithm using convolutional neural networks to improve the identification of Mallard ducks by 94.9%.

Global Optimization of Polynomial Functions, UTEP's Constraint Research and Reading Group

Undergraduate Research Assistant *May 2021 - Jan 2022*

- Created a polynomial evaluator in Python that utilizes an array manipulation method to solve the polynomial over a given interval, and developed a universal solution using the integrated interval library to apply constraint-solving methods using Julia.
- Utilized Python and Julia to decrease the time to derive data from functions using interval computations by implementing a derivative approach.
